Under present methods of manufacturing, only about 30 to 35 percent of a tree is suitable for lumber or wood panelling. What do you do with the waste wood that's left over? A new development called COM-PLY provides one answer. The COM-PLY process takes wood residues, sandwiches them between veneer and produces framing lumber (wall studs and floor joists) and panel products.

Ft. Worth, Texas 76111

Dear Mr. Gouldy:

Congratulations are in order for Gov. Mark White, Sen. Ted Lyon of Rockwall and Rep. Fred Agnich for their successful efforts in passage of the Texas Wildlife Conservation Act of 1983.

Not to be forgotten is Texans for Wildlife Conservation, whose members include the more than 800 sportsman's clubs in Texas. The group was formed to promote passage of the act, which would not have been possible without their devotion and sacrifice of time and energy.

The act gives the Texas Parks and Wildlife Department statewide authority for wildlife management and eliminates locally specialized wildlife laws previously in effect in 118 Texas counties. The Texas Wildlife Conservation Act at last enables the Parks and Wildlife Department to manage our state's wildlife resources on a scientific basis statewide.

In my opinion, it is the most far reaching wildlife conservation legislation ever passed in the state.

## Look At PIK Costs Is Made

College Station — When the final verdict is in, PIK may not be as costly a government program as some have suggested.

While estimated costs of the payment-in-kind program range from \$10 to \$22 billion, two economists with the Texas Agricultural Extension Service, Texas A&M University System, peg the cost at about \$11 billion.

Dr. Ron Knutson and Ed Smith break this figure down to \$7.5 billion as the value of PIK commodities, \$2.3 billion for deficiency payments and \$1.3 billion for diversion payments. Deficiency payments result when farm prices drop below a designated level while diversion payments are for taking cropland out of production.

Analyzing the \$11 billion cost of PIK, here's a breakdown by specific commodities: corn, \$5.4 billion; wheat, \$3.1 billion; cotton, \$1.4 billion; grain sorghum, \$700 million; and rice, \$600 million.

"Although the total cost of PIK may seem high compared to farm programs in the '70s, the figure is low compared to what the government's farm program would have cost without PIK," say Knutson and Smith. They estimate that farm program costs for 1982-83 will reach about \$18 billion and that costs for '83-'84 would total almost \$21 billion without PIK.

Since this estimated \$21 billion would include \$3 billion for the dairy support program and another \$2 billion on minor agricultural commodities, the remaining \$16 billion represents program costs for grains and cotton in the absence of PIK. Thus, if the \$11 billion estimated cost of PIK stands up, the program could be viewed as causing a net savings of about \$5 billion.

"These savings would result mainly from reduced commodity storage costs and reduced deficiency payments," say the economists.

## Stuph & Thangs

(CONT. FROM PAGE 1A) labor market under which they can bid for work on a competitive basis and this could save taxpayers and the various Govt. involved billions of dollars. Some serious studies have been made about this prevailing wages matter and they indicate that these laws are not only expensive, but discriminatory and while the unionists maintain they are

needed for job protection, it is noted that they severely limit on the job training which can get started here.

What is apparently needed is enough quality people to stand in line to congress and the legislative bodies as one-term career of politicians to get after the useless and needless unions, rules, regulations and whimsical day's conditions are a hindrance to the economy going full speed again.

Ever thine, The Editor.

P.S. - Uncle Dunk claims that the commodity markets are jumping and down these days it seems like that the problem is that no one knows what any thing is worth. Dunk says one of the most interesting developments since the Invention of the "Crop-Swap" introduced is how everyone seems to be trying to figure out how to cash in this new gimmick. A lot of folks and folks who depend on farmers, ranchers as customers are coming with more ideas than there is a hog's back, and some of 'em are have real promise! - Thus, Brothers!

### Grain Elevator Bankruptcy Bill

Grain elevator bankruptcy legislation supported by American Bankers Assn. (ABA) has been approved by the Senate Judiciary Committee. Approval of similar legislation by the House Judiciary Committee is being delayed until a bill dealing with bankruptcy court judges receives approval from the Senate Judiciary Committee.

The Senate bill, S. 445, was introduced by Sen. Robert Dole (R-Kan.) A grain elevator bankruptcy bill was passed by the Senate in the closing hours of the 97th Congress, but was not passed by the House.

The need for such legislation became apparent after several bankruptcies of large grain elevators. Farmers who had stored grain in these elevators were unable to obtain their grain or payment until ownership of the grain could be established.

S. 445 would increase the farmer's statutory right of reclamation under the Uniform Commercial Code from 10 to 20 days. The bankruptcy court would be able to void this right to reclamation but would in that case give the farmer status as a secured lender. Such an approach does not interfere with warehouse receipts or with property perfected security interests.

ABA recognized the need for a solution to the problems faced by producers in the event of bankruptcy. ABA opposed the original terms of this bill, which would have provided a 60-day "sequestration" for unsecured farmers. S. 445 and its companion bill in the House, H.R. 1800 introduced by Rep. Michael Syme (D-Okla.), are the result of extensive negotiations with staffs of the various senators and their committees and ABA plus a number of industry groups representing farmers.

Both the bills also include consumer bankruptcy provisions supported by ABA.

### TLBT Youth Show Update

The plans are made and the program is in full swing for the TLBT National Show June 8 & 9, at the Little Bear Ranch near Cresson, Texas. This National Show is very exciting and will get our young TLBT organization off to the right start.

Remember, entry deadline is May 15 and all entrants must have their show cattle at the Little Bear Ranch by 8:00 p.m. on Thursday, June 2, with the proper health papers accompanying each animal. While all entrants must be a Junior or Active member of the TLBAA, membership in a 4H or FFA chapter is not required.

The Showmanship, Public Speaking, and Essay contests have been divided into two separate divisions: 1) thru age 13, and 2) ages 14-21. There will also be a Reserve Champion and Grand Champion in both divisions, for both "owned" and "non-owned" classes.

A real treat for our Youth! Jim and Dorothy Keenom, owners of the Shotgun Ranch in Fort Worth, Texas have donated a Texas Longhorn steer to the "High Point Individual" of the show. This will be an added incentive for our youth and a wonderful addition to our already wide array of awards and prizes.

### TLBAA Affiliate Presidents Conference

On Thursday, June 2, 1983 the TLBAA will set another precedent in its phenomenal growth as a breed association. The Presidents of all the TLBAA Affiliate Organizations will hold a conference at the TLBAA office to discuss many items, including the very important role of the Affiliate Organization within the TLBAA, office procedure and the computer.

Besides the business meeting of the day, there will also be a cocktail party for the group at Al Mienlo's Clear Fork Ranch. Al is President of the North Texas/Oklahoma Affiliate. A tour of the proposed site for our National Headquarters and Museum is also in store for everyone.

### New Texas Longhorn Breeders Seminar

A "New Breeders Seminar" will be held on July 9, 1983 from 10 a.m.-4 p.m. at the Clear Fork Ranch, 100 Jenkins Road, Alamo, Texas 78008. Contact Al Mienlo or Sue Stephenson at (817) 594-8771 for more details.

All new breeders are invited and encouraged to attend this seminar. Excellent presentations containing general information for almost all aspects of the Texas Longhorn breed will be given. Any breeder (whether old or new) is invited to attend.

### TLBAA National Queen's Contest

The First Annual TLBAA National Queen's Contest will be held at the MGM Grand Hotel August 18-20. The TLBAA Affiliates are busy selecting their area contestants and various judges, who are not affiliated with the TLBAA, will select the winners.

At the MGM Grand Hotel, Las Vegas, NV, the winners will be crowned and will represent the TLBAA at the National Queen's Contest.

Representatives to the National Queen's Contest have been committed by the Affiliates: North Texas/Oklahoma, Western America, Texas & Plains, Missouri, Gulf Coast, Golden State, Texas, and Kansas.

### Red Brangus Sale Of The Rockies '83

Buyers from eight states braved a late spring Rocky Mountain snow storm over Easter weekend to attend the first Sale of the Rockies '83, hosted by North Fork Land & Cattle Company at Hotchkiss, Colorado.

"Even with the bad weather, we still had a good sale," Jack Markwood, owner of North Fork stated. "The acceptance of the Red Brangus breed was fantastic with many repeat buyers from last year. This proves to us that the 'big red mules' perform well in the northern climates."

Markwood stated two year old bulls averaged \$1815, higher than the \$1895 overall average on bulls, and 78 heifers averaged slightly over \$1100.

Volume buyer was Robert Dody of Manter, Kansas followed by Roger Joseph of Valentine, Nebraska. Other states receiving cattle from the Sale of the Rockies are New Mexico, Texas, Louisiana, Colorado, Wyoming and Utah.

The country of Egypt has the lowest suicide rate in the world.

## Hay King

**Round Bale Equipment**

K&M Mfg. Co., Inc., is manufacturing HAY KING round bale equip-  
ment. Making a two-five bale wagon that mechanically drops one  
bale at a time. The neck type and bumper pull will dump all types of  
bales. Bales fall in normal position when dumped. These wagons  
are easy to load because they load from the end and bales are  
cradled deep. These wagons are built to carry the heavy bales that  
the balers will be making.
